

## YOUR **iDEAL** TEMPERATURE... CONTROLLED

### AMBIENT, COOL AND FROZEN TRANSPORT BETWEEN TORONTO, MONTREAL AND KEY U.S. CENTRES

We have a high concentration of pharmaceutical, healthcare and food product customers. For that reason, we have years of experience and a solid understanding of transporting temperature sensitive, high value product.

Reefer technology continues to advance and now includes many features to give our customers added peace of mind. The new reefer systems and specialized reefer trailers do a better job of regulating and maintaining set temperatures throughout the trailer. Temperatures can be monitored and adjusted remotely and detailed analytics reported to our customers.

### SHIPMENT INFORMATION AT YOUR FINGERTIPS

Our business started at a time when technology was a critical component of a carrier's total service package. We understand that managing complex supply chains requires real-time shipment data, customized reporting and EDI capabilities.

We have built our company with these systems in place and continue to invest in the technology required to accommodate our clients' requirements. This is particularly true with the transport of pharmaceuticals and food products requiring set temperatures to be maintained exactly throughout their journey. The latest reefer technology is utilized so that temperatures can be monitored remotely, have back up power resources and incorporate the latest in state-of-the-art telematics.

### TECHNOLOGY FEATURES INCLUDE:

- Real-time communication at the driver level
- GPS tracking of all loads placed in our care
- Automated dispatch software that is integrated with our overall operation
- EDI capabilities
- 24/7 access to critical shipment data
- Temp tale notifications
